

## KH1508

8-Port Cat 5 High-Density KVM Switch

The KH1508 KVM Switches are control units that allow access to multiple computers from a single KVM (keyboard, monitor, and mouse) console. The KH1508 features RJ-45 connectors and Cat 5e/6 cable to link to the computers. Combined with Auto Signal Compensation (ASC) signals can travel up to 40 meters and still maintain high video resolution.

Utilizing PS/2 and USB KVM Adapter Cables for the final linkup, the KH1508 permits any combination of PCs, Macs, Sun computers, and serial devices to coexist on the installation.
