

## VE2833EUT

True 4K HDMI & USB-C HDBaseT 3.0-Lite Transceiver with EU Wall Plate / PoH (True 4K @ 40 m)

The VE2833EUT is a True 4K HDMI & USB-C HDBaseT 3.0-Lite wall plate transmitter for extending AV signals from HDMI or USB-C devices to remote displays in meeting rooms, classrooms, and professional AV installations.

### 4K HDMI & USB-C Signal Extension up to 40m for Reliable AV Transmission

The VE2833EUT transmits HDMI or USB-C sources over a single Cat 6a cable up to 40 meters, delivering uncompressed True 4K video with zero latency. This ensures stable image quality for conference and education environments while reducing cabling complexity and installation effort.

### USB-C Power Delivery up to 60W with the Included Power Adapter

The VE2833EUT USB-C port not only supports DisplayPort Alt Mode for video input, but also enables USB devices to connect to the host system via USB or USB-C, while providing up to 60W of power for charging connected USB-C devices.

### Independent Audio Routing with Bi-Directional PoH Efficiency

The VE2833EUT enables independent audio embedding, allowing users to route audio flexibly to suit different environments. To simplify installation, bi-directional PoH allows the unit to draw power from either the source or display side, eliminating the need for additional power outlets. Housed in a fanless finned heat sink for silent operation, the VE2833EUT is designed for reliable, continuous professional use.

### Auto Input Switching for Faster, Seamless Operation

Additionally, the Auto Switch function automatically detects and switches to newly connected input sources, including both video sources (HDMI or USB-C) and USB control signals, ensuring a smooth and user-friendly experience. This feature is particularly beneficial in collaborative environments, enabling quick source changes without manual intervention and enhancing overall operational efficiency.

Simply Better Connections
