

CE790R

Digital USB Console Extender w/ Audio Support (Receiver)

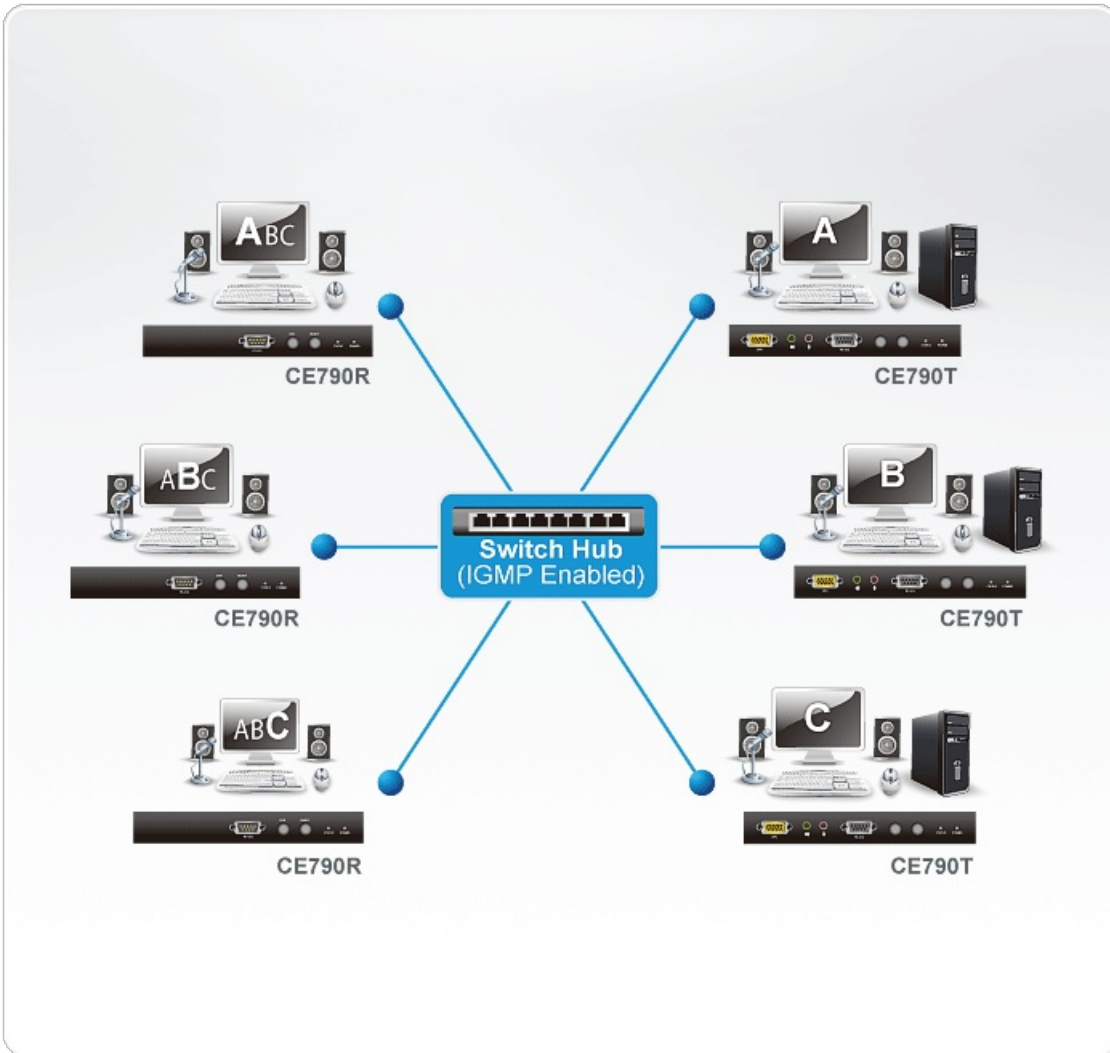

The CE790R is receiver half of the [CE790](#) digital KVM extender set and is also sold separately to expand your capabilities. The CE790R connects to a transmitter unit [CE790T](#) over your network. The receiver can select connection to a particular transmitter. An intuitive On Screen Display (OSD) simplifies the connection process. The number of potential transmitters a receiver can connect to is limited only by the number of free IP Addresses on your network. More information on the CE790R can be found on the [CE790](#) web page.

Features

- Connects across your existing network
- Allows connection to a specific transmitter
- OSD for easy transmitter selection.
- Distance limited only by the size of your LAN
